BIO – APGS – 30K

Alpha-Galactosidase

Bio-APGS-30K is an enzyme preparation derived from *Aspergillus niger* and contains high α – galactosidase activity/

Enzyme Activity:

α – galactosidase : 30,000 u/g (standardized with maltodextrin)
(Melibiase)

Activity of α – galactosidase (Melibiase) is measured by glucose released from melibiose.

Properties:-

Ingredients	α – galactosidase
Appearance	Light Brown and White fine dry powder
Activity	min. 30,000 u/g

Chemical Properties:

Optimum pH	:	5.0
pH stability	:	4.0 to 8.0
Optimum Temp.	:	40°C
Thermal stability	:	up to 65°C

Packaging:-

Custom Packaging is available.

Stability and Storage:-

Sealed containers, under cool and dried area with no direct sunlight, activity of the product will be maintained at the declared level for at least 12 months. Storage life can be extended by storing under temperature at 5°C.

Seal container after use.
