ANC Industrial Strength Compost Activator

ANC Compost Activator is a synergistic blend of enzymes, micro-nutrients and enzyme producing bacteria for efficient degradation of organic matter and faster natural composting.

ANC Compost Activator should be mixed thoroughly with the organic waste and sprinkled lightly over each layer as it is added. Organic materials are frequently collected in bins, piles or row for composting. The compost pile should be straight-sided, located preferably in a damp, shady place and kept moist but not saturated, so as to avoid leaching of soluble nutrients. Hose down dry materials when constructing the pile and check moisture content frequently.

Application rate:

To compost in piles or bins start with 1,000 kg of organic material. Moisten the material with water to consistency of a squeezed out sponge. For every 1,000 kg of compost, mix 100 gram of **ANC Compost Activator** in 20 liters of water. Blend the pre mixed liquid into the moistened material. The rate of decay may be accelerated by turning and mixing the pile.

Organic matter can be composted into humus before distributing into the soil. However, if organic materials are plowed into soil prior to degradation, **ANC Compost Activator** can be distributed over the materials before plowing.

Direct garden Application:

Distribute as evenly as possible 100 gram over 1,000 kgs of organic material and plow directly into the garden soil. Moisten the dry soil after plowing to accelerate compost action.

Physical characteristics:

Appearance:	Medium tan, free flowing powder with fermented odor.
Effective temperature:	Min. 20, Max. 60 °C
Carbon/Nitrogen:	Min. 10:1, Max. 20:1
Shelf life:	Min. 2 years

Do not use in the presence of acids or caustics.

Storage condition:

For optimal shelf life, the product is best stored in cool areas under 38 °C. Do not store in direct in sunlight. Keep container tightly closed when the product is not being used.

Precaution:

See above storage conditions. Keep out of reach of children.

Package size:

50 kilogram drum.
