Fixaton HT-RN

Fixaton HT-RN is a recently developed color improver for the disperse printing of polyester subject to HT steaming. It promotes excellent color yields and does not cause color specks. Fixaton HT-RN always improves the color yield to a brilliant shade.

General Characteristics:

Appearance:	Viscous, semi-transparent tan fluid.
Composition:	Alkyl polyoxyethylene ethers and special improving compounds.
Ionic Charge:	Nonionic.
Solubility:	Miscible with water.

Features:

1. Fixaton HT-RN is an extremely effective color improver and always generates a brilliant shade.
2. Fixaton HT-RN does not cause marking-off during storage before steaming.
3. Fixaton HT-RN is easily washed off during soaping.
4. Fixaton HT-RN causes no bleeding on the printing area.
5. Fixaton HT-RN is compatible with most chemicals used in printing and is also compatible with half-emulsion thickeners.

Application Method:

Since Fixaton HT-RN is a thick paste, it is recommended that one mix Fixaton HT-RN with stock thickener. The recommended dosage is:

Fixaton HT-RN 10-20 g/kg.

Technical Service

ANC Enzyme Solutions will assist customers with the use of our products in applications development.
