## Superol ABP

### Description

ABP is a blend of highly ethoxylated surfactants in powder form. Due to its nature it can be used in any cycle during wet garment processing to reduce the amount of backstaining along the seams and pocketing of denim garments.

### Benefits

- Compatible with anionic and nonionic agents.
- Effective on cotton and polyester fibers.
- Does not reduce enzyme activity.

### Properties

Appearance: Light Brown Powder

Solubility: Easily diluted with water

Ionic Character Nonionic

Compatibility: Compatible with Anionic and Nonionic products

### Dosage

ABP requirements are based on the extent of backstaining reduction required by the user. ABP can be dosed at 1.0-2.0% on the weight of goods throughout the wet garment process.

### Packaging

Standard package size for ABP is 25-kilogram bags.. Alternate custom packaging is available upon request for smaller or larger volumes.

### Handling

Avoid contact with skin and eyes, wash with water immediately after contact. Always close drum after opening.

### Storage

In sealed containers, under cool dry conditions out of direct sunlight.

### Technical Service

ANC Enzyme Solutions will assist customers with the use of our products in applications development.
