Mignone S

Mignone S is an anti-migration agent for fabric dyeing and drying. Mignone S provides for excellent dyestuff stability and dispersion; it also displays excellent anti-migration.

General Characteristics:

Appearance:	Viscous, slightly yellow liquid.
Composition:	Acrylic copolymer solution.
PH:	7-8
Ionic Charge:	Anionic.
Solubility:	Soluble in water through stirring.
Stability:	Extremely stable under normal storage conditions.

Features:

1. Mignone S is an anti-migration agent for direct, reactive, vat, and sulfur dyes during pad-dry processes.
2. Mignone S is stable in neutral or alkali padding baths.
3. Mignone S will not adversely affect dye dispersion or solubility.
4. Mignone S is also suitable for disperse dye padding in neutral baths.
5. Mignone S improves the diffusion of dyestuff during dyeing.

Application Method:

The optimal dosage of Mignone S depends on the dye and the specific dyeing machinery. In general, 5-10 g/l of Mignone S is sufficient.

Technical Service

ANC Enzyme Solutions will assist customers with the use of our products in applications development.
