## PectFeed

Pectinase for Feed Applications

### TECHNICAL INFORMATION

PectFeed is an enzyme preparation obtained by fermentation of *Aspergillus* spp., having major activity of Pectinase. It hydrolyzes down pectins and broad range of carbohydrate polymers. PectFeed product is approved by Kosher and Halal.

### SPECIFICATIONS

- **Appearance** : Yellowish colored powder
- **Odor** : Normal fermentation order
- **Taste** : No Specific taste
- **Miscibility** : Active ingredient is completely soluble in water
- **Dosage** : Depends on feed composition and desired effect  
General recommendation: 50-100 g / ton of feed.
- **Activity (powder)** : PectFeed: Min. 3,000 U/gm
- **Stability** : Stable at moderately high temperatures

### ADVANTAGES

- PectFeed is used for improvement of the digestibility of pectin and hemicellulose containing vegetable proteins in feeds
- PectFeed partly degrades polysaccharides in cell wall of these rawmaterials thus improving the utilization of the nutritional components

### PACKING

PectFeed is available in 25kgs HDPE / Fibre drums

### SAFETY

Material Safety Data Sheet is supplied with all products. Safety manual is available on request

### STORAGE

Cool, dry conditions and protected from sunlight are recommended for storage. When stored in original sealed containers below 25C, the product will remain stable and maintain its declared activity for atleast 6 months.
